#### WARRANTY

#### Warranty period

The warranty period commences on the date of first registration. MG covers your new MG EHS Plug-in Hybrid for 84 months or 150,000 km (whichever comes sooner). The warranty transfers to each new owner so long as it hasn't expired.

#### Warranty period of main assemblies

The MG Motor has committed itself to providing the warranty period of 84 months or 150,000 km (whichever comes sooner) for high-voltage battery pack, drive motor, power electronic box (PEB) and hybrid control unit (HCU) in key components of new energy vehicles.

To access a detailed parts and warranty statement please see the appropriate countries' MG website. For Europe, please see www.mgmotors.eu

The maintenance plan recommended in the manual is the optimum maintenance cycle based on the test operation conditions. "Regular Maintenance Plan" or "Special Maintenance Plan" shall be carried out according to integrated factors such as domestic road conditions and driving conditions.

In order to maintain the performance of the high-voltage battery pack, the customer shall carry out equalizing charge regularly (at least once a month), as detailed in the Owner's Manual.

#### Regular Maintenance Plan

· Preconditions applicable to this plan

The vehicle is consistently operated with the passenger and luggage loading within the limits laid down in the Owner's Manual;

The vehicle is driven on appropriate roads at speeds within the limits allowed by law;

The recommended fluids are always used.

· Maintenance types

The Regular Maintenance Plan is composed of Type A and Type B Inspection services. The two types are carried out at the intervals described as below.

Maintenance type	А	В	А	В	А	В	А	В
Distance (x 1,000 km)/Time (months)	24/12	48/24	72/36	96/48	120/60	144/72	168/84	192/96

Note: Amount of kilometer or month (whichever comes sooner).

· Regular Maintenance Items

Nia	Million		Service Type		
No.	Maintenance Item	А	В		
	Vehicle Interior and Exterior				
Ι	Check the function of the parking brake and adjust it as necessary.	•	•		
2	Check operation of lamps, horns and system warning indicators.	•	•		
3	Check operation and accuracy of windscreen wipers, washer and windscreen for damage - if the washer nozzles are adjustable, adjust them if required.	•	•		
4	Check the status and function of seat belt.	•	•		
5	Check various control functions of A/C.	•	•		
6	Replace air-conditioning filter.		•		
7	Replace air cleaner filter.		•		
8	Check the status and function of seat.	•	•		
9	Check the conditions of bonnet safety catch, tailgate/boot lid lock, door locks, hinges, door checks, etc., clean up all the dust and refill lubricating grease as necessary.	•	•		
	Front Compartment and Boot				
1	Check the connection and status of I2V battery.	•	•		

No.	Maintenance Irem		Service Type		
	maintenance item	А	В		
2	Check the washer fluid level and add to the standard level as necessary.	•	•		
3	Check the brake fluid and electric drive transmission fluid levels, and add to the standard level as necessary.	٠	•		
4	Check the status of cooling system such as the pipeline, radiator, cooling fan and clean the relevant surfaces as necessary.	٠	•		
5	Check the level and concentration of the coolant, add to the standard level as necessary.	•	•		
6	Check the status of engine intake manifold.		•		
7	Check the status of auxiliary drive belt.	٠	•		
8	Check the status of A/C system such as the compressor, the cooling pipeline and the condenser, and clean relevant surfaces as necessary.	٠	•		
9	Check brake servo and hose.	٠	•		
10	Replace engine air filter.		•		
11	Check the engine mounting bracket.		•		
12	Check the high/low-voltage harness for mutual interference, wear or damage.	•	•		
13	Check the appearance of high/low-voltage connector to confirm whether the surface is damaged and whether it is installed in place.	٠	•

	Vehicle Bottom				
I	Replace engine oil and oil filter.	٠	•		
2	Check the engine and electric drive transmission for oil leakage.	٠	•		
3	Check status and security of engine exhaust system, brackets and heat shields.		•		
4	Check status of fuel pipes for bending or leakage.	٠	•		
5	Check evaporative emission system such as pipes and charcoal canister etc.		•		
6	Examine front and rear brake pads, discs and calipers for wear and damage. Replace if necessary.	•	•		
7	Check brake pipes and hoses for condition and security. Ensure that hoses are not twisted or kinked.	٠	•		
8	Check the wheel bearings and drive shaft sleeve.	٠	•		
9	Check the suspension and steering system for leakage or wear.	٠	•		
10	Check the tread depth to see if the tyre is worn or damaged abnormally. Check the four-wheel alignment data and perform front and rear wheel rotation as appropriate.	٠	•		

No.	Million		Service Type		
	Maintenance Item	Α	В		
П	Check the tyre pressure, and make adjustment as necessary.	•	•		
12	Check if the chassis and underbody bolts and nuts are fastened or fixed, and replace them as necessary.	٠	•		
13	Check the mounting position of the cooling water pipe clip to ensure reliable sealing.	•	•		
14	Check the marking for fitting the high-voltage battery pack mounting bolts to see if it is moved and ensure the bolts are fastened.	•	•		
15	Check the appearance of high-voltage battery housing (including the bracket) for crack or deformation.	•	•		
16	Check the high/low-voltage harness for mutual interference, wear or damage.	•	•		
17	Check the appearance of high/low-voltage connector and if it is fitted properly; check the surface of high/low-voltage connector for damage and if it is fitted in place.	•	•		
18	Check the appearance of high-voltage battery pack vent valve for damage, and check the marking for fitting to see if it is moved.	٠	•		
19	Check the status of manual service switch to ensure reliable mounting and clean up the dust on the surface.	•	•		
	After Maintenance and Repair

INO.	No. Maintenance Item	А	В		
I	Use diagnostic software to reset maintenance interval indicator. Check and clear fault codes and check operation status of the control systems.	•	٠		
2	Check software version of electronic control units and upgrade to latest version if available.	•	٠		
3	Check the equalizing state of the high-voltage battery pack, and recommend the user to conduct equalizing charging as necessary.	•	٠		
4	Carry out the road test, and check engine response. Check the status and function of electric drive transmission, brake, cruise and steering systems.	•	•		

Special Maintenance Items

Ancillary drive belt - replace every 3 years or 100,000 km whichever comes sooner.

Electric drive transmission fluid - replace every 80,000 km.

Brake fluid - replace every 2 years.

Coolant - replace every 4 years or 96,000 km whichever comes sooner.

Fuel filter (integrated in fuel pump) - replace every 8 years or 100,000 km whichever comes sooner.

Air filter for diagnostic module of fuel tank leakage - replace every 4 years or 80,000 km whichever comes sooner.

Spark plugs - replace every 48,000 km.

Guide for panoramic sunroof maintenance - Use grease recommended by the manufacturer regularly for its maintenance. Or consult MG Dealer if the car is often driven in dusty or sandy places.

#### Special Maintenance Plan

Conditions

The special maintenance plan applies when the vehicle is consistently operated under any of the following conditions.

- · Mainly single journeys of less than 8 km each.
- In heavy, stop start traffic where the car is at idle or very low speeds for most of the time.
- Often driving at temperatures below 0 °C or above 30°C.
- · Often undergoing rapid acceleration or deceleration, or driving at high speeds.
- · Often driving in sandy and dusty conditions.
- · Driving in mountainous areas.

- Used for special purposes such as taxi, police car or transfer cart.
- · Often parking in a humid environment or driving on a road with water accumulation.
- Items
  - If the vehicle is driven under the condition of short distance, at idle speed for long time or dusty environment, engine oil and oil filter should be replaced every 5,000 km.
  - 2. Engine air filter and air-conditioning filter should be checked every 5,000 km and replaced if necessary if the car is in used in dusty or sandy conditions.
  - 3. If the vehicle is mainly driven in hilly or mountainous areas, or often in the humid environment, replace the brake fluid every 40,000 km or I year (whichever comes first).
  - 4. If the brake is applied too frequently (such as driving in mountainous areas), check or replace the brake disc and brake pad more frequently.
  - 5. Carry out the inspection items in the Type B or consult the authorised MG Repairer.

# SERVICE RECORD PAGES

The following pages provide a complete record of the routine services.

This information is important and could affect your warranty entitlement. Always make sure that the appropriate page of the Service Record is stamped and signed on the completion of each service visit.

# **REPLACEMENT MAINTENANCE BOOK**

When the final service record entry has been completed, you should order a replacement document from your MG Motor Repairer or suitable equipped service centre in order to continue keeping an accurate record of your car's service history.

Remember to transfer the details recorded under 'Vehicle Details' to your replacement book.

In most countries it is a requirement that owners be notified of safety defects that are the subject of a recall campaign for rectification, and are provided with information concerning the action they must take.

In the event of a recall campaign affecting your car, you will be contacted and invited to have your car inspected free of charge.

If you suspect that your car has been missed by a recall campaign you should contact an MG Authorised Repairer or suitable service centre for advice. Details of any work carried out on your car under a recall campaign will be recorded on this page.
